Chicago, Illinois 60604

Dear Mr. Harris:

Two homes, Belle Plaine and Magnolia, were identified as having been contaminated with mercury from a source found along a creek located near the 600 block of Belle Plaine Avenue in Gurnee, Illinois. The Lake County Health Department (LCHD) refers these two homes to the United States Environmental Protection Agency for further evaluation and remediation, as needed.

If the LCHD can be of further assistance, please contact Michael Kuhn, at 847/360-6742.

Sincerely,

Dale Galassie, M.A., M.S.
Executive Director
